

Ph.D. Thesis Overview By Panayiotis Kotsas

The Philosophical Point of View – Based on The Cambridge Dictionary of Philosophy – Ed. Robert Audi

The philosophical point of view of my Ph.D. at the University of Sheffield is based on Friedrich Nietzsche and the notion of the meaning of life.

Excerpt from the movie The meaning of Life (1983) of Monty Paythons:

- Who are the philosophers?
- Everyone who his name starts with a Σ. Like Nietzsche.
- Nietzsche doesn't start with a Σ
- Yes but it has a Σ.

Excerpt from Thus Spoke Zaratustra

- To men I am still something between a crazy and a corpse. (This is the non rigid work)
- Its last Lord it here seeketh: hostile will it be to him, and to its last God; for victory will it struggle with the great dragon. (Rigid work)

The fall of hypothesis of God is the Review of 2D/3D Registration I use it for NBA TV viewing on Ipad and Laptop and for movies viewing.

And of course through the view of life history we have a strong belief in art (The web site <http://www.kotsas.gr>).

The Chapters

1. Introduction
2. Rigid Registration of Medical images
3. Non Rigid Registration of Medical Images
4. A Review of Methods for 2D/3D Registration
5. A Review of Algorithm and Programs for Image Registration
6. Conclusions
7. References
